Our Vision

Our vision is to introduce the best of Sri Lanka's natural products to the world backed by a dedication towards sourcing the highest quality produce and continually innovating to meet growing consumer demand with the aim of promoting healthy lifestyles.

Our Brand Story

Heritage Lanka Nature products was established in 2010 in the heart of the coconut triangle in Negombo Sri Lanka: Our strategic location allows us to source the finest produce through certified organic farming networks that employ traditional farming methods which utilize optimal natural inputs This uniquely Sri Lankan farming methodology ensures that only the best plants are regrown, giving us the best yield. Our evolving products are also created to cater to minimal human interactions,

We are a fully certified ISO 22000, GMP and HACCP company obtained through SGS Lanka, ensuring that our certified food safety methods are on par with international standards. Our manufacturing plant, located in Katana is equipped with our own microbiology lab to conduct accurate testing. The plant is inclusive with a fully automated production line with the latest packaging machinery with minimal human intervention to prevent any contaminations Thereby, delivering promising products that are certified organic and made from fresh produce. Our promise towards delivering high quality product is not limited to the sourcing process. The production takes place in the capacity to conduct the entire process of production under one roof, while paying attention to the smallest detail to ensure that only the finest quality products enter the market

At Heritage, we combine our passion for innovation with a philosophy that has always evolved around your health your life and your future well-being. This has inspired to provide the best products Felps uplift the quality of life. This ethos extends to the food grade material and the equipment that is used throughout the process with each step being carefully supervised by our experienced product and quality assurance teams; ensuring that every product we offer is of the highest value and quality

But our efforts do not end there. Our mission towards uplifting the well-being is also strongly embedded in the team who works with us and their work practices Through fair trade agreements, we support to enrich the lifestyle of estate farmers. Our extended team comprises of local community members who work closely together with us in making our purpose relive. As we source our products from organic farms that use organic fertilizers this in tum supports organically grown, locally sourced produce, making it a sustainable and environmentally conscious effort by all

Sustainability is a practice of innovation and a value system and we believe in giving back to the community and people through naturally derived products for healthy livelihood. Our growing team comprises of local community members who work closely together. They are a part of our tentage family where we all share a common purpose

We at Heritage, strongly believe that all these efforts made today are directed towards our future outlook for Heritage enabling people with healthy livelihoods together with sustainable life choices

Our Dedication Towards Sustainability

We at Heritage, are concerned about giving back to the society and help its sustainability agenda. Our passion towards high quality and sustainable produce is not limited to our customers but to its wider stakeholders and is a part of our process and supply chain.

We source our products from organic farmers that use organic fertilizers, continuously educate them about organic farming and their processes to bring out the best organically produced products. We are conscious about the value it creates more than the price premium we pay and more importantly the value that we create to the environment at large with reduced environmental pollution through organically produced foods.

Sustainability is a practice of innovation and a value system that is embedded in our culture and we strongly believe in giving back to community and people through naturally derived products for healthy livelihood. Our research and development team is dedicated in improving the harvest yield and to empower the under plantations to conduct harvesting.

Our commitment towards the environment is to create a greener space with adequate waste water cleaning and management system to ensure that the waste is properly eliminated. Our production plant also includes solar power systems that generates renewable energy for operations.

Our employees are being treated and empowered to do better with continuous product training given on their routine work and supporting a better livelihood through financial support for them and their families. This extends to providing interest free loans together with free staff transport, annual trips to our valuable staff in giving support to them in non-financial forms.

Coconut Base Culinary Range

www.heritagelanka.com

Virgin Coconut Oil

Virgin Coconut Oil is a truly miracle product sourced from the finest coconuts. Virgin Coconut Oil (VCO) is produced by cold-pressing the liquid from the coconut kernel, and later filtered. The entire process is carried below 60 degrees Celsius. It is 100% natural, unbleached and cold-pressed. Virgin coconut oil is popular for its pleasant aroma, taste, powerful antioxidants, healthy fatty acids and essential vitamins and its goodness for skin and hair.

Ginger Tea

Ginger tea is a herbal beverage that is made from ginger root. Ginger tea is made by placing fresh ginger into boiling water and allowing it to steep, or by stirring a spoonful of ginger preserves into hot water. Ginger tea has a warming, slightly spicy taste.

Heritage in 2030

We believe humanity can benefit greatly from naturally derived foods and accompaniments made through sustainable agriculture. Our future outlook is where we will continuously innovate to uplift the livelihoods of people through naturally derived foods. We will be in support of the sustainable living plan in being a carbon neutral organization by 2030 taking another leap in promoting sustainable agriculture making a positive impact in the livelihoods of people.
